Art Unit: 1638

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 17-18, 20 and 23-25, drawn to plant seed comprising somatropin, classified in class 800, subclass 288, for example.

Page 2

II. Claims 26-29, drawn to a fusion protein comprising an oil body protein and somatropin, classified in class 530, subclass 350, for example.

The inventions are distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different functions.

The invention of Group I requires a chimeric gene comprising a seed-specific promoter and a somatropin-encoding region, and methods for plant transformation and regeneration, each not required by Group II. The invention of Group II requires an isolated protein, comprising an oil body protein, each not required by any other group. Furthermore, the isolated fusion protein could be made by a process other than expression and isolation from the transformed plant of Group I, such as chemical synthesis or expression and isolation in a transformed microbial host.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, subject matter, and fields of search, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the

fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to David T. Fox whose telephone number is (703) 308-0280. The examiner can

normally be reached on Monday through Friday from 10:30AM to 7:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy

Nelson, can be reached on (703) 306-3218. The fax phone number for this Group is (703) 872-

9306. The after final fax phone number is (703) 872-9307.

Any inquiry of a general nature or relating to the status of this application or proceeding should be

directed to the Group receptionist whose telephone number is (703) 308-0196.
